Data protection notice

Data protection notice
This questionnaire collects information about your background, living situation, and experiences during hot weather. Taking part is voluntary. You can skip any question or stop at any time.

Your responses will be used only for research/project purposes. Do not write your name, exact address, phone number, or other information that can identify you in open-text answers.

We will store the data securely and only the project/research team will have access. We will keep the data only as long as needed for the proåject and then delete it or remove identifying details.

If you have questions about how your data is used, or you want to request access, correction, or deletion of your data, contact: hossein.moradi@univ-grenoble-alpes.fr

By continuing, you confirm that you agree to take part.

Section 1: Demographics Profile

This section asks about your basic background.

Which city/town and country do you currently live in?

What is your age group?

- Under 18
- 18–44
- 45–59
- 60 or older
- Prefer not to answer

What is your gender identity?

- Male
- Female
- Prefer to self-describe
- Prefer not to answer

If you selected "Self-describe," you may specify (optional):

What is your highest education level?

- No formal schooling
- Primary school
- High school / secondary
- Higher education (college/university)
- Prefer not to answer

Section 2: Living Conditions and Resources

This section focuses on your home and its access to basic resources during hot weather. Your answers will help us understand how living conditions affect people's ability to cope with heat.

Which of the following apply to your household (including you)? (Check all that apply)

- Children (under 18) or older adult(s) (65+) live here
- Person with limited local-language skills or new to the area lives here
- Pregnant person lives here or Infant(s) (under 1 year) live here
- Someone with a chronic illness or disability lives here
- Someone with limited mobility or who needs help with daily activities lives her
- Pets live here
- None of the above
- Other

If you selected "Other", please specify:

_____

Which option best describes your home's heat protection and cooling?

	Well protected + Air conditioning (AC)	Well protected + Fans or natural ventilation	Well protected + Poor ventilation (no effective cooling)	Exposed to heat + Air conditioning (AC)	Exposed to heat + Fans or natural ventilation	Exposed to heat + Poor ventilation (no effective cooling)
Home protection	○	○	○	○	○	○

How often does your home experience interruptions to essential services (electricity and/or water)?

	Often (almost every heatwave)	Sometimes (occasionally)	Rarely	Never
Power interruptions	○	○	○	○

Which of the following resources does your household have to cope with extreme heat indoors? (Select all that apply)

- Financial capacity for major cooling investments (Can afford to purchase equipment such as AC or other cooling devices)
- Financial capacity for higher utility costs (Can afford increased electricity or water bills during heatwaves)
- Adequate home heat protection (Good insulation, shading, ventilation, or other structural heat protection)
- Support or backup resources (Backup power/water supply or financial/community assistance during heatwaves)
- Other

Please specify if you choose "Other"

Which of the following resources do you have access to outside your home during extreme heat? (Select all that apply)

- Access to cooled public or commercial spaces (e.g., cooling centers, air-conditioned public buildings, malls)
- Access to shaded or green outdoor areas (e.g., parks, tree cover, shaded public spaces)
- Access to reliable water and basic services (e.g., public drinking water, public facilities)
- Mobility and social support (Transportation to reach cooler places or support from family/community)
- Other

Could you describe if you choose "Other"

Section 3: Past Heatwave Experience & Actual Responses

This section asks about your personal experiences during past heatwaves. If you have not experienced a heatwave, please go to Section 4.
There are no right or wrong answers; we are only interested in your experiences.

In the last 5 years, have you experienced at least one heatwave?

- Yes, several times (3 or more)
- Yes, once or twice
- No, never

If you have experienced more than one heatwave, please answer the next questions about one heatwave only. Choose either your most recent heatwave or the most severe heatwave you experienced.

During the hottest hours of that heatwave, how severe did the heat feel where you spent most of your time?

- Extreme (dangerously hot, normal activities not possible)
- Severe (very hot, difficult to function normally)
- Moderate (hot and uncomfortable for long periods)
- Mild (noticeably warm but manageable)
- I don’t remember

In the days just before that heatwave started, if you knew about it in advance (from any source), did you do any of the following to prepare? (Check all that apply)

- Prepared my home indoors (e.g., checked fans/AC, improved shading, ventilation, insulation)
- Stocked up on essentials (e.g., extra water, food, medicines)
- Identified or planned to use cooler outdoor places (e.g., shaded areas, cooling centers)
- Adjusted living arrangements with family (e.g., planned to stay together in a cooler home)
- Followed guidance or received support from community groups, NGOs, or public authorities
- Used specific heatwave services provided (e.g., cooling water distribution, official cooling centers)
- Other

If you selected "Other", please describe what you did:

During that heatwave, did you or someone in your household have any health problems or disabilities?

- No
- Yes, someone was already unwell (chronic illness or disability)
- Yes, someone became unwell because of the heatwave (heat-related symptoms)
- Both (already unwell and became worse or unwell due to the heatwave)

If anyone had heat-related symptoms: What actions did you take to respond to those symptoms? (Check all that apply)

- Rested at home and did basic cooling/self-care (e.g., rehydrating, taking a shower)
- Contacted a family member, neighbour or friend
- Took self-care measures at home (e.g., drinking water, resting, cooling the body, using AC/fans)
- Sought medical treatment (e.g., contacted a doctor, pharmacist, clinic, or emergency services)
- Sought help from family, neighbors, or community members
- Other

If you selected “Other”, please describe what you did:

During the hottest parts of that heatwave, which of the following actions did you take? (Check all that apply)

- Stayed indoors and used cooling (e.g., AC, fans, shading, closing blinds)
- Reduced physical activity or changed daily routines (e.g., avoided midday heat)
- Increased water intake and cooling practices (e.g., showers, wet cloths)
- Spent time in cooler public or shaded places (e.g., parks, cooling centers, malls)
- Stayed with or hosted family/friends in a cooler home
- Received or relied on support from community groups, NGOs, or public services
- Reduced physical activity or changed daily routines (e.g., avoided midday heat)_2
- Other

If you selected “Other”, please describe what you did:

Section 4: Preparation, Knowledge & Potential Future Responses

This section asks about your knowledge of heat protection, how prepared you feel for future heatwaves, and what kind of support or information could help you in the future.

The next questions list different types of support that may be available during or around heatwaves (short-term, mid-term, and long-term). Some options may not exist where you live. For each category, please select the options that you think would be most helpful.

Short-term support (during a heatwave): choose up to 3

- Real-time heat alerts and clear public guidance
- Temporary cooling centers or misting stations and extended public building hours
- Distribution of water and essential supplies (e.g., food, basic necessities)
- Emergency financial assistance for electricity or water bills
- Outreach and check-ins for vulnerable people (elderly, sick, isolated)

Is there any type of immediate support you would like to have during heatwaves that is currently not available or not easy to access for you?

Mid-term support (before the next heatwave / next weeks or months): choose up to 3

- Subsidies or vouchers for purchasing cooling equipment (e.g., fans, AC)
- Seasonal financial support for increased electricity or water bills
- Home improvement assistance (e.g., shading, insulation, ventilation upgrades)
- Community heat preparedness programs and neighborhood response networks
- Public awareness campaigns and practical training on heat protection

Is there any type of mid-term support you would like to have during heatwaves that is currently not available or not easy to access for you?

Long-term support (longer-term changes over years): choose up to 3

- Expansion of green spaces and urban tree canopy
- Urban design measures to reduce heat islands (e.g., cool roofs, reflective materials, shaded streets)
- Stronger building standards for heat-resilient housing (insulation, ventilation, passive cooling)
- Large-scale housing retrofitting programs for thermal protection
- Long-term social protection and energy assistance reforms for vulnerable households

Thinking about future heatwaves, is there any other long-term support you would find helpful?
